SOUTH COAST AIR QUALITY MANAGEMENT DISTRICT

MEMORANDUM

DATE: August 2, 1993
TO: Pat Leyden
FROM: Mohsen Nazemi /s/ by MN
SUBJECT: Application/Evaluation Fees for Change of Condition-AB-2588 Section

Earlier this year we prioritized Group 3 of the Phase I facilities in the AB-2588 program, and required some to complete a health risk assessment. Some of these facilities have stopped the use or reduced emissions of certain compounds. Based on their present emissions some of the facilities may not be required to conduct health risk assessments anymore due to their new prioritization scores.

AB-2588 Section is requiring these facilities to apply for change of condition as part of the recategorization policy. A facility is then dropped from health risk assessment requirement if the facility agrees to certain permanent enforceable conditions. The change of condition would merely require the addition of a restriction or elimination of certain toxic substances from permitted equipment. No increase (most likely reduction) in criteria pollutants will occur and thus this change will not be subject to NSR review under Reg. XIII or Rule 1401.

Recently the District Board amended Reg. III (Rule 301) which includes the language for such simple permit condition changes, and the permit processing fee for this type of application will be \$150 pursuant to Rule 301 (c)(3) effective July 1, 1993. AB-2588 Section had already informed those facilities applying for change of conditions for the purpose of recategorization that the fee for permit modification will be \$150 per application. Although this fee is effective from July 1, 1993, in order to complete the reprioritization and recategorization, applications for change of permit conditions were required to be filed earlier. Therefore, it is recommended that we charge \$150 for each re-issued permit as required by AB-2588 Section, including those applications submitted prior to July 1, 1993.

If you agree with my recommendations, please initial this memo so it can be distributed to the SSC staff.

Thank you.

/s/ 8/3/93 OK Pat
